

## PRIVACY IMPACT ASSESSMENT (PIA)

**PRESCRIBING AUTHORITY:** DoD Instruction 5400.16, "DoD Privacy Impact Assessment (PIA) Guidance". Complete this form for Department of Defense (DoD) information systems or electronic collections of information (referred to as an "electronic collection" for the purpose of this form) that collect, maintain, use, and/or disseminate personally identifiable information (PII) about members of the public, Federal employees, contractors, or foreign nationals employed at U.S. military facilities internationally. In the case where no PII is collected, the PIA will serve as a conclusive determination that privacy requirements do not apply to system.

**c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.**

The Medical Treatment Facility (MTF) Enclave will provide core services to the medical center's enterprise to include collections of storage arrays, networking infrastructure, backup and recovery devices, virtual server infrastructure, physical servers, file and print servers, local applications, and COTS based server applications that manage MTF business processes and operations. The MTF Enclave will adopt and inherit higher level security controls, when and where possible, from the Defense Health Agency (DHA) network. The MTF Enclave will be an enclave within the DHA network. The rationale for the clear division of boundary scope from the parent network will be to realize the unique and demanding levels of service and regulatory compliances that are uniquely imposed on medical operations and the need for specialized on-site staff to address these demands with clear lines of demarcation between the two.

The MTF enclave architecture consists of hardware, software, and telecommunications systems. The enclave includes user interfaces such as workstations and laptops and hosts office automation as well as medical systems and applications. Personally Identifiable Information (PII) may be collected, maintained, processed, or disseminated by systems and applications within the enclave or documents stored on file servers and shared drives. PII may include numerous types of PII including employee and beneficiary contact information, military information, demographic information, Social Security Number (SSN), and Protected Health Information (PHI). Commercial-Off-The-Shelf (COTS) applications such as Microsoft Word, Excel, PowerPoint, and Outlook are utilized to provide administrative support to the enclave and may process PII.

PII processed on some system components, applications, and documents might utilize specific administrative, physical, and technical security controls to protect PII confidentiality and which may be addressed in separate PIAs. Such PIAs are available at: <https://dodcio.defense.gov/In-the-News/Privacy-Impact-Assessments.aspx/>.

**d. Why is the PII collected and/or what is the intended use of the PII?** (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)
